FACULTY OF LAW

LAW

The Law Undergraduate Program trains professionals with a comprehensive knowledge of the diverse areas of the law, particularly corporate law, based on an ethical approach. It has a modern and constantly updated curriculum that places research as the backbone, including mandatory subjects from the main law branches and a wide set of elective subjects, which are available to all students at their own specialization interest. This humanistic training allows graduates to analyze, interpret, debate, and apply the law, proposing solutions to legal issues based on knowledge and social responsibility and from a local and global perspective.
